

Satellite radio is the best thing that has happened to radio. I travel a lot and it's very nice not having to surf to radio dial seeking music or program that I enjoy. Most station that I enjoy on the satellite are commerical free which releives me from listening to ads for products that I may never use. Other broadcasters need to dump there over paid and boring DJ's that are controlled by some "FAT CATS" that are in some far away town not allowing them to play the music that their listeners want to hear.  
LEAVE SATELLITE RADIO ALONG!!! It's made driving more pleasurable.
